

Fluid sensors

Our capacitive level sensors detect transparent, liquid and granular, conducting and non conducting materials without contact.

EBE develops, manufactures and supplies high performance capacitive level sensors using innovative technologies even to price-sensitive markets. Where people work with liquids and bulk materials and the level has to be determined, our sensors are first choice:

- White Goods (p.e. water tanks)
- Automotive (p.e. tank filling level)
- Medical Engineering
- Food Industry
- Beverage Industry
- Chemical Industry
- Pharmaceutical Industry

Our enthusiasm for engineering and our constant strive to improve our technologies have helped us to develop product solutions for our customers and maintain a competitive edge. We also have the right sensor for your application and we are glad to give you our expert advice.
